DETAILED ACTION

Claim Objections

1. Claims 1, 10, 19, and 22 are objected to because of the following informalities:

Claim 1, lines 7 and 9, "the first signal" and "the second signal" should be – a first signal- and – a second signal-. Appropriate correction is required.

Claims 10, 19, and 22, refer to correction of Claim 1.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding all independent claims 1, 10, 19, and 22, it is unclear how the "signals" are designated based on "dividing the M communication signals by three". It is well known to one skilled that frames conforming to the SONET standard are already "designated" to carry line & path overhead and payload. In light of the standard, the signals that are within the frame are already designated. Furthermore, in view of the body of the independent Claims 1, 10, 19, and 22, the body lacks functional steps in determining "a first signal" and "a second signal".

It is also unclear what is meant by "designating each Y+1th signal of the M signal through the Mth communication signal as being controlled by a signal Y positions prior

thereto". Applicant is requested to reference the specification so mete and bounds can be determined.
